## The Speakership.

Who shall be Speaker of the next House of Representatives of the United States? The question is already beginning to be agitated, that thus far no candidate seems to have been fairly put upon the track, except Hon. N. P. Banks, Jr., of Massachusetts. This gentleman will have for support, a considerable number of votes and a position tolerably certain, besides what it affords double reason to expect him to take from the fact that he is one of the first Know Nothings elected to Congress. Mr. Banks is also an educated, intelligent gentleman, well calculated to win friends by his agreeable manners and generally popular bearing. His chances of success, however, are hardly promising. If a Whig candidate for Speaker should be presented, he will at least divide the vote of the anti-slaveholding States with Mr Banks, who, with his well-known extra free-soil views, can scarcely expect a single vote from the South.—*New York Times.*

We agree with the Times that the contest for the Speakership is not as Mr. Banks' name has been mentioned in that connection, it will naturally induce other nominations. We would therefore put forward the name of Hon. Isaac Wadsworth, Jr., of the Fifth Congressional District of Maine, as an eminently suitable candidate for the station. He was nominated for the Speakership, at the Congressional Convention of this District, last fall, and we know has been supported from many other sections of the country, only a desire to have Mr. Wadsworth occupy that position.—There is no man in Congress who holds a higher place in the public regard than Mr. Wadsworth, a person who possesses more sterling qualities of head and heart, of a purer moral character. He has built up for himself a reputation for ability, for honesty, and for faithfulness to his principles, distinguished for his conservatism in the Union, and has a record unsurpassed, through the past four years in Congress, to enable him to discharge the responsible duties of Speaker with unbounded satisfaction. It seems to be conceded, that the North should now claim the Speakership—the place having been filled, for the last two years by Southern men—and here is no Northern or southern man in our opinion, who would be more generally acceptable than Mr. Wadsworth.

We learn that Rev. J. H. Allen in accordance with the strongly expressed desire of his Union-street Society, has he should consider his duties in this patch, has concluded to accept the invitation extended to him for a three years' settlement. He will avail himself of the kind furlough granted him for travel and leaves the city on Monday next for a trip to Europe. During the summer and early part of the fall—returning, probably, in September or October. He will spend a short time in England and thence proceed to Paris, and he intends a the great "Exposition of Industry" now open. After which as time may permit, he will visit interesting localities in Central and Southern Europe—including, probably as far south as Naples.

The Cunard steamship Africa leaves Boston for Liverpool, on Wednesday, the 9th instant, —on which ship we presume Mr. Allen will take passage.

During Mr. Allen's absence, the pulpit of the Union-street Church will be supplied as the Standing Committee may be able to make arrangements. It is probable there will be preaching nearly every Sabbath. Notice will be given from time to time.

A. Confession.—Edmund Burke, of the State Journal Reporters, at Concord N. H., has heretofore been about as strongly identified with northern pro slave views, as any man in the country. In the last number of his paper, however, a full and complete adhesion is given to a restoration in full force, of the Missouri Compromise, to resistance to the admission of Kansas as a slave State, and in opposition to and denunciation of the recent outrages of the desperadoes who crossed to Kansas.

We received in that fact, an indication that the Know-Nothings in New Hampshire are determined to throw their influence in favor of practical free-soilism, and that the politicians understand that nothing can be hoped from that order, if any man who does not stand upon that platform.

A Big Western's Work. Some of the Bangor lumbermen in Minnesota think they have been doing a smart business the past winter. The work of one six ox team is given us by a correspondent, with the remark that he thinks it hard to beat, and that if our Penobscot friends can make a better report, he would like to hear it. The lumbering business was under the management of Amos P. Roberts of How and Mc.—"head boss" for Hersey, Staples & Co., and the team was driven by Abraham Sutherland, formerly of Saco, Me. In 127 days, eight thousand logs, which will make between two and three million feet, were cut on Township No. 28, N. R. 25 W. on the St. Croix river, and hauled into Ground Nut Creek.

The Journal had an account, yesterday, of a transact on at Ellsworth, wherein one Irishman, appeared to have been murdered, his relatives insulted and his corpse maimed, by bloody-minded "Hundoos." The story seemed utterly absurd to us. The Mercury seems by a person from Ellsworth that nothing of the kind has taken place there and we think there can be little if any foundation for the story.

Lectures to Ladies.—Mrs Johnson's second course of lectures upon Physiology commences this afternoon at 4 o'clock, at the City Hall. We hope the ladies of Bangor will give her a full class.

Fire.—The "Old Tavern Stand," at West Gloucester, was destroyed by fire on Tuesday last.

One of the mills at "Federation Village," (in Bamapo, York county,) was burned on Monday.

**Massachusetts Know-Nothingism.**—The Boston Telegraph of Wednesday evening says the Know Nothing State Council met in that city on Tuesday; and that John W. Foster of Brimfield was chosen President, Gov. Gardner (having declined), James E. Falkwell of Boston, Vice Presidents; E. C. Baker, Secretary; Lt. Gov. Brown, Treasurer; Chas. A. Phelps Instructor, (in place of the notorious Hiss;) and Dr. Wood Marshal.

Henry J. Gardner of Boston, Henry Wilson of Natick, Edward Buffington of Fall River, J. W. Foster of Brimfield, Henry H. Rug of Jamaica, Andrew A. Richmond of Adams, and Augustus C. Carey of Ipswich, were chosen the delegates to the National Council, in June next at Philadelphia.

The temper of the Council was decidedly anti-slavery. The Telegraph says: A. B. Ely, Esq. made an anti slavery know nothing speech. Strong anti slavery resolves were passed in the evening, without a dissenting voice. Some who were Hunkers heretofore, admitted it was no use the order must take anti-slavery ground.

It is evident from the action of the Council, that the order by repeated, that the anti-slavery men of the order have the power and will use it to put down whoever shall act himself against the anti-slavery sentiment of the State.

Destructive Fire at St. John, N. B. On Saturday last the steam saw mills owned by James Smith & Son (the celebrated builders of the "Marco Polo"), were burned, the men having left at dinner thought, carelessly left the fires when they went to dinner. The fire communicated to the sheds, blacksmith's shop &c., and then running along with fearful rapidity, it communicated with a splendid new ship, almost ready for launching, and in a few hours all was destroyed. Fears were entertained that the fire would extend to the adjoining yard occupied by Messrs. Wright, in which was a very large new ship in course, of construction, but owing to the exertions of the men who displayed great energy, at which it extended spreading further. The loss to the Messrs. Smith by this sad unlucky affair, will be over eighty thousand dollars, there being only a slight insurance of two thousand dollars. The ship was a splendid specimen of naval architecture, of 1930 tons. The wind being high, and the ship having been tarred, it was impossible to do any thing to prevent the burning, also the difficulty of obtaining water was very great, the tide being low at the time.

The above facts are given by a correspondent of the Boston Journal.

The Mayor of Jersey City has vetoed the prohibitory liquor law passed by the Common Council. An attempt to re enact the ordinance over the veto was defeated.

A Bath paper reports that the steamer Kennebec is to run between the Kennebec river and Portland, this summer.

Temperature of April.—In Portland, the average temperature of April, this year, was one degree higher than that of April, last year.

Thanks to Edwards & Co's, Hodgman, Carr & Co's Expresses, and to Mr. Cushing, Clerk of the Daniel Webster, for late Boston papers.

Military.—The Brewer Artillery will parade on Saturday afternoon next.

It is rumored that Judge Loring will not be removed by Governor Gardner.

The Wheat Crop. The Evansville (Ind. Journal states as the result of the numerous inquiries made in that region "that the whole prospects of this part of the country have never been better than they are now at this stage of the season. The last week's rain, whether, with the warm rain, having started vegetation of all kinds into new life the wheat crops appear to feel the effects amazingly. At the present time all is well in this particular. The accounts from abroad, so far as this State is concerned, are discouraging for good wheat crops, while all accounts unite in saying that we will have much larger quantity of wheat than has ever been sown than last season. The weather of the last week has been highly favorable to the farming interests. The fruit in this region promises well." The editor of the Hickman (Ky.) Courier is informed by intelligent farmers from Tennessee and in Kentucky that the prospects of an abundant wheat crop were never better than at present. A great deal more than the usual amount was sown last fall, in order to supply the deficiency in the crop, which will be mostly felt in the coming summer months. Hence, with an ordinary season more than an average yield may be expected, but as such a vast quantity was sown, a more abundant harvest will be gathered than ever before known in that region of the country.

Passed reports are gratifying—but there is no danger of too large a production of food this year. There will be good demand, for all that can be raised throughout the country.

The New Haven Disaster. From the New Haven Palladium of Monday, we learn that Alfred Wright, the young man who was shot through the head on Saturday by Clark, because of his marriage with a lady to whom Clark had paid addresses, remains in a very critical condition. The physicians have generally come to the conclusion that the bullet has passed through the head, and that there is no chance for life. Clark is in prison, and still manifests a dogged obstinacy and indifference as to the fate of Mr. Wright. The deed was in all probability deliberately planned and coolly executed. Clark was engaged in his usual business occupation at the time of his arrest.—When told that he must go to jail, he replied, "Well I suppose I must;" and taking a sum of money from his pocket gave it to his partner with directions in regard to the payment of some debts, and then told the officer that he was ready to go.—*Boston Journal.*

Wright is since dead.

The St. Lawrence. The Toronto correspondent of the New York Commercial Advertiser says that the report of the board of engineers appointed to make a survey of the St. Lawrence, has been laid before the Provincial Assembly. Their examination of the river extended from Ogdensburgh to the head of the Lachine Canal near Montreal, and their report states that at the sum of $720,000 there can be excavated throughout that distance a channel two hundred feet in width with a uniform depth of twenty five feet, and in places having an additional depth of thirteen feet. The parts of river proposed to be improved are the Galoppe rapids, the North channel of the Long Sault rapids, and the several rapids between Lakes St. Louis and St. Francis. In the course of the survey, the engineers employed upon it, made 38,000 soundings, and expended 8280 pounds of powder in experimental blasting.

From the Correspondence of the London Times.

## A Novel and Interesting Scene—An Armistice at Sebastopol.

Head Quarters Sebastopol,
Monday, March 26, 1855.

Early on Saturday morning a flag of truce was sent by the Allies, with a proposition to the Russians for an armistice to bury the dead, which were lying in numbers—five or six Russians to every Frenchman and Englishman—in front of the Round Tower and Mamelon, and, after some delay an answer in the affirmative was returned, and it was arranged that two hours should be granted for collecting and carrying away the dead on both sides. The news spread through the camps, and the races which the Chasseurs d'Afrique had got up in excellent style, were much shorn of their attractions by the opportunity afforded to us of meeting our enemies on neutral ground. All the ravines leading to the front trenches were crowded with officers hastening on horse and foot down to the scene of so much hard fighting. The fresh of the hills and the slopes in front of the batteries were covered with men, and they dotted the deadly interval between the batteries, which had been before occupied alone by thousands of tons of shot and fragments of shell discharged by the French and English and Russians during the protracted siege. The day was beautifully bright and warm. White flags waved gently in the mild Spring breeze above the embrasures of our batteries and of the Round Tower and Mamelon. No a soul had been visible in front of the lines at instant before the emblems of peace were run up to the flag-staffs, and a sullen gun from the Mamelon, and a burst of smoke from Gordon's batteries had but a short time previously heralded the armistice. The instant the flags were hoisted, friends and foes clambered out of the embrasures. The Riflemen of the Allies and of the enemy rose from their lairs in the rifle pits, and mustered towards each other to behold their grim handiwork. The whole of the space between the Russian lines and our own, was filled with groups of unarmed soldiery. Passing down by the Middle Picket Ravine, which is now occupied by the French, and which runs down in front of the Light Division camp, I came out upon the advanced French trench, within a few hundred yards of the Mamelon. The sight was strange beyond conception.—French, English and Russian officers were walking about, saluting each other courteously as they passed, and occasionally entering into conversation, and a constant interchange of little civilities—such as offering and receiving cigar-lights, was going on at each little group. Some of the Russian officers were evidently men of high rank and breeding. Their established manners contrasted remarkably with their plain and rather coarse clothing. They wore, with few exceptions, the miserable long gray coat over their uniforms. The French officers were all in *grande tenue*, and offered a striking contrast to many of our own officers, who were dressed a la Balaklava, and were in rough head dresses, tartan coats, and round serpent jackets. Many of the Russians looked remarkably like English gentlemen in style of face and bearing. One tall, fine-looking old man with a long, gray beard and strange-shaped cap, was pointed out to us as Hetman of the Cossacks in the Crimea, but it did not appear as if there were many men of very high military rank present. But while all this civility was going on we were walking among the dead, over blood-stained ground, covered with evidences of recent fight. Broken muskets bayonets, cartouch-boxes, caps, fragments of clothing, straps of belts, pieces of shell, little pools of clotted blood, shot—round and grape—shattered gabions and sand bags, were visible around us on every side, and through the murmur of the crowd stalked a solemn procession of soldiers, bearing their departed comrades to their long homes. I counted 77 litters borne past me in ten minutes—each filled with a dead enemy. The contortions of the dead were horrible, and recalled the memories of the fields of Alma and Inkermann. In the midst of all this stern evidence of war, a certain amount of lively conversation began to spring up, in which the Russian officers indulged in a little badinage.—Some of them asked our officers whether we were coming on to take the place," others "when we thought of going away. Some congratulated us upon the excellent opportunity we had of getting a good look at Sebastopol, as the chance of a nearer view, except on similar occasions, was not, in the opinion, very probable. One officer asked a private confidentially in English, how many men we sent into the trenches.—"Begorra, only seven thousand a night, and a wake evening party of ten thousand," was the ready reply. The officer laughed, and turned away. The armistice was over about three o'clock. Scarcely had the white flag disappeared behind the parapet of the Mamelon before a round shot from the sailors' battery went slap through one of the embrasures of the Russian work, and dashed up a great pillar of earth inside. The Russians at once replied, and the noise of cannon soon reverberated through the ravines.

Crossing the St. Lawrence. The St. Lawrence river at Montreal continued, it has seems, (Wednesday, the 25th,) to be filled with ice. On Monday last, as we learn from the Montreal Transcript, twenty-three persons including thirteen ladies and gentlemen who wished to take the cars for Boston, and ten ferrymen, undertook to cross the river on foot.—When about four hundred yards from the Montreal shore, a loud shouting from the land side which they had quitted, and a sharp hissing sound, caused by the rapid upturning of the ice above them, warned them that a "shove" had commenced, and that the ice was moving down. They were in a very dangerous position, and immediately commenced making for the shore. Around them was a moving mass of jagged, rotten ice, and they were obliged to jump from one cake to another. Finally, all reached a place of safety with the exception of one gentleman, Mr Sanderson, who was brought ashore by the current upon a cake of ice, dead. Whether he was stunned, or crushed by the concussion of the ice, or whether he was frightened to death, is not known.

Philadelphia Elections. *Philadelphia, May 2.* The returns of our election yesterday are conflicting, and the result will not be known with certainty until the official returns are published. It is generally thought that the reform candidates for Treasurer and Commissioner, supported by the Democrats and Whigs against the know-Nothings, were elected by a majority of about 150, and that the Councils will stand as follows: Select Council—9 Democrats, 15 Know-Nothings. Common Council 35 Democrats, 38 Know Nothings. On the other hand, the Whig papers elect Morton (American) for Treasurer, and slightly vary the complexion of the Councils from the above figures.

Governor Reeder has called a new election of members of the legislature for May, to fill vacancies in certain districts where the Missourians claim to have triumphed. The Baltimore Sun in reference to the conduct of the Missourians says:

"These things must not be—cannot be, under a government of law and order. Excesses though remote, are felt pulsating to the very centre of our national organization. Acts of wrong and outrage have been perpetrated on the soil of Kansas, and are still held in *terrorem* over the people of that territory, or over good citizens of Missouri by the bad, the interposition of the general government should not be invoked in vain."

The report that Mr Mason, Commissioner of Patents, was about to resign his office is contradicted.

The Russians appear to be adopting the same mode of resisting invasion in the Baltic as they did in the Black sea. The supposed to Aho, Helsingfors, and every town on the coast from Wyborg up to Tornea, have been rendered impassable by the sinking of vessels in the sailing channel; Aho, Bjornoborg, and other towns, have armed themselves with double-barrelled rifles. On the southern coast of the Baltic the conviction is general that Riga will be made the first point of attack in the coming Baltic campaign. On the sea side, vessels and large blocks of stone are being sunk at the entrance of the bay, so that the shallow-going craft will not be able to pass Dunaburgh. At the further end of the bay there have been several heavily-armed batteries erected, in a semi circular form. On the land side a fortified camp is being formed, capable of containing two divisions of the Russian troops. The Baltic army, which was to be brought up to 100,000 men by the late Emperor, is to be raised to 140,000 men.

Feeding a Carpet Bag. Travelling on the Erie Railroad, some days since, a gentleman took advantage of delay at one of the stations to take a hasty dinner. He carried his carpet-bag with him, and placed it upon a chair beside him while he partook of the meal. The landlord came round and claimed double fare on account of the carpet bag occupying a chair. "My dear sir," said the gentleman, "this is outrageous, there is plenty of room." "Can't help it sir," said the host, "anything occupying a seat must pay for a dinner at this table."—The gentleman paid the amount demanded, and quietly taking out a bunch of keys proceeded to open wide the jaws of the carpet bag, into which he coolly proceeded to cram everything within his reach. Nuts, raisins, oranges, pies, cakes, etc. etc., were emptied into the capacious maw of the carpet bag, the gentleman observing that "if he had to pay for the bag's dinner, he was bound that the bag should have something to eat." There was much laughter about this time, at the expense of the landlord.

Tuning Pianos.—Considerable labor may be saved in pruning by pinching off all superfluous buds with the thumb and finger. The top may be formed in most cases without the use of the knife, to suit the taste. It should be done as soon as the buds begin to grow, and before the wood becomes too hard. If you wish a stocky growth, you must prune sparingly, for a tree must have leaves as well as roots to support it, and naturally the roots and tops of trees correspond with each other. Prune your trees so that the tops may be formed from nine and a half to two and a half feet from the ground. Experience shows this to be the best method. We should be willing to receive benefit from the experience of others, for our lives are not long enough to learn everything ourselves, and experience is a thorough bred teacher. Skill in our horticultural affairs is the result of experience, and an active, energetic man is one who learns by it, and is ready to impart his knowledge to others for their benefit.—*Michigan Farmer.*

The Coal Receipts.—The anthracite coal tonnage from the Schuylkill region was enormous last week—large than ever before reported in any one week. The Reading Railroad brought down, with that previously brought down this year, 661,161 tons against 550,705 tons in the same time last year. The shipments on the Schuylkill Navigation for the week were also very large, reaching 31,128 tons—making for the season 165,478 tons, against 112,59 tons to the same time last year. The Lehigh Navigation Company is just getting fairly at work.

The Origin of the Fire in Commercial Street.—The editor of the Bee has the name and residence of a boy who declares that he saw the commencement of the recent destructive fire on the wharves. He says that an Irishman was lighting a pipe upon Battery wharf, and carelessly threw his match against a bale of cotton, which instantly ignited. He endeavored to extinguish the flames, and to roll the cotton overboard, but before he could do this the flames had spread to other bales and the whole building was on fire.—*Boston Times.*

Washington Item.—The Washington correspondent of the Journal of Commerce writes under date of April 28th:—

"The war panic being over, the country may have repose on that question till politicians and filibusters, on our side, or petty an insolence on the part of Cuban authorities, shall occasion its revival. The Kansas war is the next matter of consideration, and it has proceeded so far, that Governor Wise will no doubt be endangered should he return to his government, even after being fully sustained as to his official conduct, by the Federal Government, to which he is about to make an appeal in person.

We find in the Boston Daily Advertiser, the following account of a celebration at Harvard College:

"On Friday, July 20, will be the first public celebration at Cambridge, of the Alpha Delta Phi Society, an association which has affiliations in a number of the most respectable colleges of the country. The Harvard Chapter was established at Cambridge eleven years since. On the present occasion an oration will be delivered by James C. Carter, Esq., of the city of New York, and a poem by Mr. Wm. Sydney Thayer, of the New York Evening Post.

A Supposed Slaver.—The Journal of Commerce states that on the 22d of April the brig Horatio, of Thomaston, was fallen in with deserted, about fifteen miles southeast from Sand Key, and taken in to Key West. Her appearance indicated that she had been used as a slaver, and it is supposed that she has landed a cargo of slaves on the coast of Cuba, and was then deserted. The Horatio, Captain Martin, sailed from New York on the 1st of November last for the coast of Africa, and was seen near the African shore on about the 1st of January. Since then nothing was heard of her until she was found deserted as stated above.

Havana Markets, Apr. 23. A brisk business was going on in sugars at prices favoring sellers. Molasses firm and exhibiting an improved tendency; sales at 2½ reals per keg. Codfish in small supply, sales at $5.75. Lumber in moderate demand; boards $24 to $26 50, box shooks dull and very abundant.—Freights active and tonnage decreasing; to Cowes and a market £2 to £3 2s 6d, United States $1 50 per box sugar, $3.50 to $7 for hhds. and $3 to $3 50 for molasses. Exchange has improved, sterling 8½ per cent discount.

Love Story Married.—On the 1st inst., in West Brookfield, Mass., Henry B. Blackwell was married to Lucy Stone. Among the ceremonies of the occasion, was the signing by both parties, of a protest "against the whole system by which the legal existence of the wife is suspended during marriage." Rev. T. W. Higginson, who officiated on the occasion, says "the bridegroom is a man of tried worth, a leader in the Western anti slavery movement."

A produce dealer in Buffalo, who has bought Canadian wheat during the winter, paying the duty, as required, subject to the recovery of the same, has received fifteen thousand dollars from the Treasury, as a refunding of the impost, which is a clear profit over and above that made in the sale of the wheat.

The Russians propose to erect a grand monument at St Petersburg in honor of the late Emperor.

Rockland, May 1st.—Schooner Joseph Baker, Ames, loaded with lime bound to N York was found to be on fire some days ago and was closed up in order to smother the fire out, last night it was found the fire was breaking out, and she was scuttled. It is supposed she will be got up and repaired, as the hull is not probably much burned. The loss of course is a total loss.

It is stated that the Hon. Isaac E. Morse was specially instructed to prosecute Post-master Kendall, of New Orleans. In the preliminary examination, it was stated, on the part of the prosecution, that it could be proved that notes were stolen from a letter mailed at Memphis, that those notes were marked, and that they were found to have been afterwards deposited by Mr. Kendall.

A New Planet. Mr. H. A. Gould, Jr., in a Pamphlet Circular of the Astronomical Journal, dated the 27th inst., records the announcement under date of April 7th, by Mr. Le Verrier that on the previous evening at 10h. 5m., Mr. Chacornac discovered a small planet of the eleventh magnitude in the thirteenth hour of right-ascension. This new planet, if an asteroid, forms the thirty-fourth of the group.

On the 23d inst., a citizen of Beloit, Wisconsin, who awakened by the noise of a burglar, who fired a pistol at him as he sprang from his bed. Snatching a gun from the wall, he shot the intruder dead, and then hastily calling the nearest neighbor, examined the body and discovered that the robber and would-be murderer was that neighbor's son.

Advices from Kansas City, dated on the 16th of April, to George Walker, Esq., General Superintendent of the League in New York, state that three steamers loaded with settlers arrived on the 15th at Kansas. A severe drought prevailed, and the supplies of grain were nearly exhausted. Provisions were high, lumber scarce, and no sign of rain. The thermometer stood at 88 degrees at noon on the 15th.

Santa Anna Very Sick. The correspondent of the New Orleans Bee at Mexico asserts that Santa Anna was so seriously ill that he was not expected to live, his malady being an affection of the head, causing a perfect stupor. The last news from the South seemed to have exaggerated his sickness.

Nebraska. Senator David R. Atchison of Missouri has been nominated for President, and Isaac Toucey of Connecticut for Vice President, by the squatter sovereigns of Grand Nemaha, Nebraska Territory.

Sale of Real Estate.—Mr Carleton Bragg recently sold store No 4 Broad st occupied by Bragg, Mussey & Co., to Mr Mark Rice for $7000.—*Journal.*

Washington, May 1.—The U. S. Treasurer's statement, shows that the amount in the Treasury on the 23d ult., subject to draft, was $20,263,087.

### MARRIED:

In this city, May 3d, by Rev. Mr. Tenney, Mr. William C. Bagsford to Miss Mary Ann C. Lowell, both of Bangor.

In Hiram, 19, April 1855, by Paul Shepherd, Marion Rambo to Miss Lilley Wilkes.

In this city May 2d, by Prof. Shepard, Mr. Philip Lord, of Boston, to Mrs. Mary Ann Morrison, of Bangor.

NOW and during the month of May, at Shop No. 117 Broad street, opposite John Hopkins Jr.'s, will be found from 8 A.M. and from 2 to 4 P.M.

Morrison's Shingle Machine.—This valuable invention, which we were the first to publish to the world, seems to be everywhere received with much favor. We find the following notice of the machine in the Ohio Farmer, in which the correspondent from the Michigan State Fair was exhibited: "I can only mention here one more machine, of much ingenuity and which by the way, is destined to do a great deal of work in the world. I refer to Morrison's Shingle Machine, which was exhibited in full operation, and attracted immense crowds of admiring spectators. I allude to J. H. Morrison's Patent Shingle Machine exhibited by Mr. H. F. Vaughan, of Rochester, N. Y. It was propelled by a neat little steam engine on wheels provided for the purpose, which was so arranged as to run part of the fair ground and exhibited to great advantage by its quick motion and noiseless movements. All at the same time, two blocks of cedar were fed to the different parts of the machine, each kind of timber that can be used with advantage to the old way, is adapted for shingles in this machine, and presents the most perfect article in the line of shingles I ever saw. It is used either by horse or steam power, and is capable of making from 40 to 50 thousand of shingles per day. A gentleman present living in the north part of the State, exclaimed that this machine and Merrill's Lath Machine were the only two perfect machines in existence, perfecting the economy of builders."—(Rochester Union.

☞ We were invited yesterday to see the operation of Morrison's shingle Machine. This machine can be driven by steam or horse power, and will make from 50 to 72,000 shingles per day, or one every second. For such perfect work, it is the most simple machinery we have ever seen and the least liable to get out of order. The principle is this.—The shingle bolt is held on a platform and a knife traverses once a second takes off the shingle, which falls on the bedplate, while it is shaved on one side, it falls on two more, then the other side is shaved, then between two pointers which plane the edges, a spring then pushes the shingle from the machine, complete. Each shingle thus made is of the same thickness, and of a fine taper from butt to point. It takes up but little room, and could be transported or moved about in the woods with but little trouble. It was remarked some years ago in an English newspaper, that the Americans had invented a paper mill that by throwing in a handful of rags at one end, produced a sheet of paper at the other with Morrison's Shingle Machine all that has to be done is to hold the bolts in one end, and shingles fly from the other faster than they can be counted, and superior in make to any others.
(Milwaukee Sentinel.

BANGOR DAILY WHIG AND COURIER.

## TELEGRAPHIC

TO THE DAILY WHIG AND COURIER

**Connecticut Legislature.**

Hartford, May 4d.

The Legislature this morning elected Wm T Minor, American, Governor of the State for the ensuing year. The vote was, Minor 177. Ingersoll, Dem. 10. The other State officers were also elected

The message of the Governor was delivered this afternoon. He recommends the proposed amendment of the Constitution, extending the right of suffrage to colored persons, and requiring persons to be able to read and write before they are allowed to be electors. Recommends an appropriation in aid of the State Agriculture Society. Says he should regard the repeal of the prohibition of the liquor law as a detrimental to the best interests of the State. Says the balance in the Treasury at the end of fiscal year was $36,000. Considers that in the recent election the people have reiterated their emphatic condemnation of the action among the Territories of Kansas and Nebraska.

**Falling of a Suspension Bridge.**

Patterson, N. J. May 3d.

The new bridge recently erected over the Passaic river, above the Falls, fell this morning while the test, 20 tons, was applied. There were about 33 persons on the structure at the time, most of whom were precipitated into the water. Two of them were seriously injured, and it is feared there are some persons under the ruins. This is the second suspension bridge that has been put over this river at this point within a year.

**Various Matters.**

New Orleans, May 3d.

Freights to Liverpool one farthing.

The cotton ship After with 2000 bales of cotton, has been burnt on the Lafa River

Philadelphia, May 3d.

MYSTERIOUS DISAPPEARANCE.—We are informed that Mr. Rae came to the city on Tuesday of last week, accompanied by his daughter on his way to Montreal to place at the Female Seminary in Brantford. On reaching this city he proceeded in a carriage to the residence of a gentleman in Park street, where he remained a short time and then left, saying that he had some business to attend to and that he would come in the morning for his daughter to take her to Gorham's. Nothing has been heard from him since, and his baggage, most of which has been already removed from the time he left the house. The friends of Mr. Rae can assign no cause for his disappearance.—*Port. Adv.*

FIRE. The dwelling house of a Mr Clough, in Kingston, was destroyed by fire last Saturday morning. Loss about $600. Insurance $

NEW DISCOVERY.

**Brown's Compound for the Hair.**

This Compound has been prepared with the greatest care, from the recipe of one of the first physicians in Germany. It is decidedly preferable to any article of the kind which is before the public. Although but recently introduced, its advantages are acknowledged by the many who have used it. It is a SURE REMEDY FOR BALDNESS, a certain preventive of the hair falling off and unequalled in promoting its growth and beauty. It can be safely relied on, and need only to be used to be proved. Warranted to give satisfaction.

For sale by the Sole Proprietor, J. R. INGRAHAM, Corner of Hanover 6m

Bangor, March 29 1855 dtf

New England Roofing Company,

MANUFACTURERS OF

WARREN'S IMPROVED

Fire and Water Proof

Composition Roofs,

Office——7 Liberty Square, Boston.

THIS Company would respectfully solicit the attention of Builders and Architects, Manufacturers, and the Public, to this much approved system of Roofing which has been very generally adopted in the cities of Buffalo, Cincinnati, Chicago, and St. Louis, and with in the past year in Boston and vicinity, where it has given entire satisfaction It is rapidly superseding the use of all other kinds of Roof, and is confidently offered to the Public, as a mode of Roofing most permanable in every important particular

The materials employed are none of them subject to corrosion or rust like the metals and will they expand and contract with the changes of temperature, like tin and iron, nor shrink in dry weather, and swell in damp, like shingles, and other wood coverings.

It combines in a greater degree than any other Fire Proof Roof now in use, the natural requisites of cheapness, durability, and security against both Fire and Water

These Roofs require an inclination of not more than one inch to the foot leaving it in good condition for a promenade for drying purposes, and is of particular advantage to adjoining buildings in the event of Fire

They are afforded at a much less price than any other Fire Proof Roof The amount of material saved, and which would be used (by the old method) in raising the walls, and framing a strong Roof, still further reduces the cost of the building

Another advantage gained, is the securing of rooms in the Upper Story, of the same dimensions and quite as convenient as those in the lower part of the building The expense of a Three Story building, with this improvement, not being greater than that of a building of two stories with the pitched roof There is a further saving in the cost of gutters

These roofs are not affected by the jar of machinery—like those of Tin or Slate

The Composition is so prepared that it is not affected by the extremes of heat or cold

In case of injury from any cause whatever, no roof is so easily or quickly repaired

Further information obtained by applying at either of the Company's Offices.

### HAS ARRIVED.

The Volunteer Testimony of Living Witnesses, is that

### Hayes' Allied Ointment,
### and Humor Syrup,

Is the BEST REMEDY ever offered to the public for the Cure of all Humors.

It has stood the test more than seven years, and in offering it to the public we can consistently offer a guarantee that it is not to be classed with the ALBUMINATOR—PAIN and SPREADING humbugs now afloat, many kinds of which, and nearly as worthless, combined, have been published over and over to the public, as we are shown by the evidence of living witnesses.

*Read the following—it speaks for itself!*

Bangor, Me., June 12, 1851

We the undersigned, citizens of Baltimore, having used the Celebrated Allied Ointment prepared by Dr. E. B. Hayes, of this city, are nearly personally acquainted with the Doctor, feel pleasure in having it in our testimony in favor of his Doctor claims to Patronage, etc. Unlike other remedies in the market, and preparations performed in office opened by said Doctor, they are not secret, but are known with his most happy results, the mysterious being left by him from the effects of the Ointment.

Gentlemen are fully entitled to the cordially recommending it to the notice, and the confidence known as the advertising all it claims to.

A. M. BUNKER, A. WESTON,
ARTHUR SON, ALEXANDER.

ST CLEVE

The Q. Rheum, Sea Salts, Rose ointment, White Precipitate Unguentum Hemorrhoidale, Liquid Blood Purifying and Sudatic, Children's Pills, Preparation against Rheumatism, Fever Sores and Old Mercurial Sores, Sore eyes long standing, Tetter Sore all those troubles and Fever Sores, Erysipelas, Blotches, Blisters from the sun, Tanning the skin pure, Pimply and Mealy, address given to the beauty of complexion. Warts, &c. &c. Should it be the least one to cause It will draw Worms from the Stomach, Lungs, Throat, and from the Head and Nose, by an outward application. It stops even the night sweats, effectually, in three or four days. Troubled with Sore throat, by removing the Phlegm and removing in the night.

### Hayes' Pile Ointment,

A Certain CURE for PILES, and all External Troubles. 1 Directions in the bottles. Price $1.

Prepared only by E. B. Hayes, and sold, wholesale and retail, by CHARLES L. KENT, General Agent for the United States and Canada, No. 108 Appleton Block, Lawrence Hall, Lawrence, Mass., to whom all orders must be addressed.

GILMAN HARLOW, Genl Agent for Bangor, Me., and sole retailer.

Bangor and sold by druggists generally. 82-ly

Leave Pittsfield at 5,15 and 10 20 A.M. for Waterville, to connect with the trains there for Portland and Boston same day.

—RETURNING—

Leave Waterville on arrival of each train from Portland.

Stages run daily between Bangor and Pittsfield, to connect with trains at both.

EDWIN NOYES,
Apr 27, 1855 Sup't A. & K. R. R.

### DR. J. H. SCHENCK'S
### PULMONIC SYRUP,
### For the Cure of Consumption.

THE proprietor of this medicine was himself, a few years ago, reduced so low as to be given up by his physicians and friends, in the last stage of Consumption. When all hopes of ever getting rid of it had fled, he was strongly recommended to try a Syrup made from an old Indian receipt, which was considered in effectually curing him. He finally did so, and a large number of respectable gentlemen certified to the facts of this case, and said the Pulmonic Syrup obtained a reputation never equalled in that part of the country. Considering this case solid, I resolved second to that of myself, Dr. Schenck was wasted upon by many similarly afflicted, to whom he administered the Syrup with the same beneficial results. In fact, such was the notoriety of this medicine, that other physicians had their attention drawn toward the lung reputation of it, from having witnessed its curative powers, and freely extended the hand of friendship and encouragement to Dr. Schenck, and introduced the medicine to the public and used it in their daily practice.

No other medicine operates upon the system in the manner that the Pulmonic Syrup does. It produces a healthy action upon the morbid parts, by purifying them from disease, it promotes the expectorations, all are the cough ripens the matter on the lungs, and when it is discharged, it heals the spot and that by breaking up the tubercles or all cases produces, and the lungs become sound and resume the performance of their natural functions. It also soothes the irritated portion of the lungs and other organs, and thus restores these parts to health. A superior property this medicine possesses over all others is, that it contains no opium, calomel, or any other deleterious medicine.

In 1851 Dr. Schenck removed from Plymouth Meeting, New Jersey, to Philadelphia, and commenced the practice of his profession, where he soon received a reputation equalled by none, in curing all cases that had before been deemed incurable, and he has since been daily presented to the world incontestible evidence of his success.

Both of his patients died with Consumption, which appears to have been an hereditary disease with his father's family. All his brothers and sisters except one, died early of this disease, some of them, but the one brother, reaching the age of twenty.

Thus left nearly the last of his family, he naturally felt the alarm, and one after another were consigned to the silent tomb by this fell destroyer.

### VOLUNTARY TESTIMONY.

We, the subscribers, residents of Flemington, do hereby certify that we are well acquainted with D. J. H. Schenck, he was attacked by disease, which, as we believe, terminated in Pulmonary Consumption; under the operation of which he was reduced so low as to be unable to leave his bed for a long time, and to all appearance was past recovery. He is now perfectly well—his cough and fever are off him, and we feel satisfied in declaring it as our belief that these symptoms have resulting from the use of the Pulmonic Syrup

### The Most Successful Remedy.

REV. WALTER CLARKE'S

### Great European Cough Remedy,
—OR—
### Universal Cough Mixture,

IS unquestionably the best remedy for Coughs and Chronic Pulmonary diseases ever discovered. Read the following certificates, and mark for they are all from persons of first rate respectability, and they all live in this State, and are willing to answer all enquiries addressed to them—Read and judge for yourselves—they are selected from a multitude of others.

*From Dr. John Brown, Liberty, Me.*

DEAR SIR—I have made use of your European Cough Remedy for a cough with which I have been afflicted for some time, to my entire satisfaction, and have also employed it in my practice with the happiest results, and am fully convinced that it is one of the best medicines in use for what it is recommended. JOHN BROWN, M. D.

MRS. RUSSWURM, of Scarborough, had for ten years and ten months been afflicted with a most distressing cough, with extreme pressure of the lungs, and other painful symptoms. During this time she had employed good physicians, and taken many of the popular advertised medicines without experiencing any permanent benefit. Many times she was obliged to sit up for hours, not being able to lie down lying down, and her friends despaired of her recovery. Last June she was induced to try Rev. W. Clarke's Great European Cough Remedy. A trial bottle, 75 cts., greatly relieved her, and encouraged her to try a large one, 1 dollar, and to the astonishment of all who knew her, these two bottles, without any other medicine whatever, completely restored her to health, which she continues to enjoy.

Mr. and Mrs. Hunt would both themselves ready to answer all enquiries respecting the above extraordinary cure, and are satisfied that the European Cough Mixture is the best Remedy known for Coughs and disorders of the Chest and Lungs, and as such they recommend it to the afflicted.

They also state that Mr. Watson, one of their neighbors, who was considered by his friends to be in *consumption*, was persuaded to try the European Cough Remedy, and the result was a rapid recovery.

*Remarkable Cure of Phthisic*, with severe Cough, communicated by Mr. Brewster, Postmaster at Cortis Corner, Aug. 20th, 1854. Rev. Walter Clarke—*Dear Sir* Mr. Samuel Shaw, residing in Greene, Kennebec county, Me., has been afflicted with the Phthisic for a number of years. During the past winter he was so distressed for breath, that he could not lay down. At last hearing of the European Cough Remedy, he sent for a bottle and commenced taking it. He was greatly relieved by the first dose, and from that time he rested well at night. A few bottles completed the cure, and he now desires to recommend the medicine to others, as he is fully assured that it is worthy of the utmost confidence.

The following has just been received from John Dresser, Esq., agent for Paris, Me., dated Nov 8, 1855

*Dear Sir*—You will recollect that when you were here I had a severe cough of three months standing, I had tried all the cough medicines I could obtain without success. Your medicine has cured it. It has also cured many of my neighbors. Please send me some more medicine immediately. Yours, &c. JOHN DRESSER.

Rev. T. Oliver, West Waterville, testifies to the extraordinary cure of a lady, who, to all appearance, was in the last stage of consumption, so that it was thought she could live but a short time. A single bottle cured her cough, and she especially recovered. Rev. Oliver states that he knows another person who a long time had been afflicted with the Phthisic, with severe cough, &c., who was completely cured by two bottles of the Universal Cough Mixture.

☞Sold wholesale by the Proprietor, at Cornishville, Maine.

*General Agents for Maine*, O. F. Sargent & Co., Druggists, No. 8 corner Smith's Block, Bangor, and H. H. Hay, Portland. Also, sold wholesale and retail by W. L. Alden, and Guild & Harlow, and at retail by the other druggists in the city—at Belmont by T. Chick Newbury, E. Mills; Exeter, R. S. Parker; Orland, ——; Emerson; Penobscot, Varrien & Co. and A. Perkins; Ellsworth, C. O. Peck, Augusta, Wm. Black—and by Agents and Medicine Dealers throughout the country.

## PUBLIC HOUSES.

### WADLEIGH HOUSE,
OLDTOWN, ME
S. W. DUDLEY.

The above well known stand has been thoroughly overhauled and renovated, and in all its appointments the comfort of the travelling public has been consulted. fsbl

### STANLEY HOUSE,
WATER STREET, AUGUSTA, ME.

G. W. RICKER, would respectfully announce to the Travelling Public that he has repaired the Stanley House, Augusta, and furnished it throughout with NEW and ELEGANT FURNITURE, and made every arrangement necessary to continuing it as a First Class Hotel.

This is the most centrally located House in the city, being directly opposite the Depot, and in close proximity to the steamboat Landing. Court House, Post Office, and but a few minutes walk from the State House.

Business men, or persons travelling for pleasure, will find that this House affords every convenience or luxury that can be desired, and the Proprietor is determined to spare no pains to make it in every respect second to none in the State.

Books for all Stages leaving town will be kept at this House.

In connection with the above are good Stables with attentive and careful Hostlers.

Nov 18, 1854.

### Everett House,
### At Foot of Moose-head Lake,
### GREENVILLE, ME.

W. H. GROSSMAN, formerly of the Waterville House, Waterville, and JOHN SHAW, formerly of the King House Bath, would respectfully announce to the public generally, that they have taken the above named new and commodious House, and furnished it throughout with substantial and elegant furniture, and are prepared to furnish the travelling Public or Pleasure Parties, with better accommodations than can be found at most Hotels in large cities.

*As a Summer Retreat*

For Hunting, Fishing Bathing, or to the Invalid in Pursuit of Scenery, this House and location offers great attractions—more probably than any in the State of Maine.

Persons travelling for business or pleasure will find at this House a table well supplied with the luxuries of the season, good Rooms and every accommodation on which can be desired.

The subscribers hope, by strict attention to business, and keeping in every respect a good House, to receive a liberal share of patronage.

### House-keepers, look at this
### Admirable Invention!
### JUST RECEIVED!
ANOTHER LARGE LOT OF
PATENT SELF HEATING
### SMOOTHING IRONS!

MANY important improvements have been made since the beginning of the present century, relieving and facilitating the labor of man by machinery and other instrumental implements, but few, if any, have been of more real utility than the Patent Self Heating Smoothing Iron, which will relieve them, in every great degree, from the excessive and fatiguing labor of Ironing, besides being a great saving of time and expense. This Iron combines economy, convenience, saving of labor, and dispatch—one dollar's worth of dry charcoal supplies fuel for a whole day's constant ironing. Hot wood coal from the stove will answer the same purpose. It can be used in any room or in the open air. Hatten's and Factory Irons are constructed upon the same principle, and possess equal superiority.

For sale, wholesale and retail, by the subscriber, who is the only Agent for Penobscot County

ALBERT NOYES.

### R. R. R.
### IMPORTANT PROOF OF CURATION.
### A Great Mystery Explained.

In the year of our Lord 1845, a gentleman of undoubted integrity, well known and highly respected in the community in which he lived, was induced to purchase a quantity of Radway's Ready Relief, which he applied to a bad case of rheumatism, from which he had suffered for many months, and the result was a perfect cure. Since that time, Radway's Ready Relief has been introduced into the Bremen Hospital, and has been used in many of the most severe cases of rheumatism, and the result has been in every instance a perfect cure.

I am now introduced this Remedy to the world under the name of

RADWAY'S READY RELIEF

It has been used by hundreds of persons in this city, and throughout the United States, and in every instance it has proved a perfect success. In all troubled with Pain or Sickness

One application will convince you, or a few drops taken orally, will instantly free the sufferer from the most excruciating pains, and restore the weak, sickly, and prostrated to health and vigor.

No person has ever used RADWAY'S READY RELIEF without declaring it the most speedy relief in the world. It will relieve them, in every great degree, from the excessive and fatiguing labor of Ironing, besides being a great saving of time and expense. This Iron combines economy, convenience, saving of labor, and dispatch—one dollar's worth of dry charcoal supplies fuel for a whole day's constant ironing. Hot wood coal from the stove will answer the same purpose. It can be used in any room or in the open air. Hatten's and Factory Irons are constructed upon the same principle, and possess equal superiority.
